

FIBROL PETROLEUM HT LCX-2 460 GREASE

BENEFITS

- Thickener does not melt extremely high dropping point.
- Will not soften and leak from bearings exposed to high temperature.
- Resistance to water washing, steam and humid conditions.
- Consistency maintained despite cycling temperature conditions.
- Good pump ability and High pressure loading capacity
- Wide operating temperature range: -20°C to (+) 180°C. (300 F)
- Consistency maintained despite cycling temperature conditions.
- Leading to increased equipment/bearing life.
- Superior corrosion protection and good extreme pressure properties enhancing component life and reducing maintenance.
- Excellent product stability under both service and storage conditions.
